

## **Effective revision strategies for ART**

- 1) Make a piece. Make a copy of the copy, and do that 5 times, playing with size, etc. Take your copies and continue to play with them. Draw on top, cut apart, add colour.
- 2) Do a similar process digitally. Take a photo or scan of your piece, etc.
- 3) Take a skill and practice this – example Tone / shading, etc.
- 4) When watching others create art work, students use the same critical thinking skills required in revision. May write down the process or do this practically.
- 5) Reflection on your art work: Reflect on how your piece changed, what do you like, what do you dislike?
