

Effective revision strategies for MATHS

1. Watch Video Tutorials

- YouTube has lots of tutorials if you want to revise a specific topic, for example “Adding Fractions” or “Angles in a Triangle” or “Calculating the mean”

2. Practice Practice Practice

- the key to revising maths is lots of practice!

3. Hegarty Maths

- You are not restricted to doing the tasks that you are set each week on Hegarty Maths. You can access any of the videos and questions on any of the topics you want.

4. Y10 – Exam Paper Practice

- Year 10 students need to start to attempt exam-style questions. Exam papers is a great way of revising lots of topics at once and helping to identify areas for improvement
