

YEAR 10 Curriculum Bulletin

English

English Language

Students will continue to prepare for English Language, paper 1 and following their study of the reading section last half term, will move on to the creative writing element of the course. Students will move on to write their own pieces of creative writing inspired by a stimulus and will continue to develop and enhance their own writing styles using a wide range of vocabulary and stylistic features.

English Literature.

Students will complete their study of Romeo and Juliet, culminating in an assessment that tests their understanding of character, plot and context in preparation for their English Literature paper 1 examination. They will then move on to study the AQA anthology collection: Worlds and Lives where they will build on their knowledge of poetry from Key Stage 3.

Maths

Stu

Science

Co

History

Students will continue with their GCSE Medicine Through Time studies. We are specifically focused on the 18th and 19th centuries and students should start to see change and progress occur in the field of Medical history.

Weekly home learning will be set and this must be completed. The home learning will be based around the students' green CGP revision guides. It is important that Y10 understand the need to revise and review past topics in green CGP guides, in order to develop good routines for Year 11.

Geography

In Span

Engineering

Students will be working through mathematical principles within Civil Engineering/Architecture. The focus will be on calculating area, volume, and scale within architectural drawings. Students will refer to the proportion or ratio that defines size within architectural drawings and how models, architectural plans, maps all use scale to create the illusion of correct size relationships between objects. Using formal drawing techniques and CAD, the following architectural drawing techniques will be applied: Block Plans, Floor Plans, Cross Sections and Elevation Drawings, Orthographic Drawings & Perspective Drawings.

Art

Art: African Art project

The Aim of this half term is for students to complete their Final 3D sculpture and samples exploring different medium. Students will, demonstrate the ability to refine ideas and purposefully experiment with different materials and techniques.

Physical Education

Students

Textiles

Textiles: Coast, Tea and Cake Project

The Aim of this half term is for students to complete their cushions and samples. They will do this exploring various textile techniques machine and hand stitching.

Religious Studies

Students

Dance

In BTEC Performing

Music

In Music,

Computer Science

They are working their way through computer networks and are about to start covering some of the more technical aspects, such as; the internet, DNS and hosting, Layers and protocols, wireless encryption and network standards. They will briefly start cyber security but it will all be interspersed with exposure to some more advanced programming techniques. They will start introducing file handling, sub-routines and arrays to their current grasp of programming basics.

Business & Enterprise

Drama

In BTEC Performing Arts

Hospitality

Students are commencing with Unit 1: The Hospitality Industry. Specifically looking at AC 1.1: types of business, job roles, suppliers, ratings and standards.

In addition, students will develop their practical preparation and cooking skills. We will be focusing on a variety of skill-based dishes and looking at deboning and filleting. These will provide the basis for creating their menus as part of their coursework in Year 11 and improve their independence and competence in the food room.
